 Employed  
 15 with a  
 maximum  
 staff of 6 at  
 any one  
 time.

Hazard	Harm	At RISK	Risk Control in place	Factors			Risk Rating	Additional Risk control to be considered or implemented
				L	S	R		
Slipping, Tripping and Falls	Physical Injury	Employees, Customers	<p>It should be expected that the floor at times will be wet and slippy, therefore extra caution should be taken when moving through the site. The Supervisor should ensure that site manager are made aware of areas that need to be made safe, and appropriate signs should be used to clearly define the area as a hazard. All accidents MUST be reported asap, to the site contact and Line Manager. Also an entry made in the reporting logs, and a copy sent to CPsm Office.</p>	1	2	2	Acc.	<p>The Supervisor should be actively monitoring the condition of the floor though out the site and be aware of areas where the floor is likely to be hazardous (e.g. around the storage areas and toilets). Supervisors should make the site manager or staff aware if there is a spillage so the floor can be made safe. If necessary the Supervisor should move people away from the spillage, danger area until a member of staff arrives and makes the area safe.</p>

**Tel: 07787788811 dgap@hotmail.co.uk**

<b>Changes in Floor Levels Uneven Ground</b>	<b>Physical Injury</b>	<b>Employees, Customers</b>	<p>Through the venue - site there maybe changes in floor levels (not including stairs) and uneven ground and potentially holes or excavation work. Or uneven floor fittings and carpets etc. The Supervisors should be aware of;</p> <ul style="list-style-type: none"> <li>-Outside areas</li> <li>-Suitable sturdy footwear, steel toe cap ankle support boots are to be worn at all times if on sites, on venues suitable protective boots with ankle support.</li> <li>-Stick to designated walk areas, or paths.</li> </ul>	1	2	2	Acc.	<p>The Supervisors should be fully aware of the site layout. Additional diligence should be shown around these raised area regarding spillages, or hazardous locations. Supervisors should make the site manager aware if there is a spillage so the floor can be made safe etc. If necessary, the Supervisor should move people away from the spillage until a member of trained staff arrives. It is imperative that wet floor or danger area signs are placed where required or cordoned off.</p> <p>Supervisors MUST report any issues to the person in charge on site, and in their reporting logs.</p>
<b>Wall Fittings</b>	<b>Physical Injury</b>	<b>Employees, Customers</b>	<p>Through the venue - site there are various objects mounted on the walls, cabins etc. Inc. poster holders, light or heater fittings, containers, first aid or emergency station locations. The Supervisors should be aware where these objects are and show due diligence in preventing injury to themselves and customers.</p>	1	1	1	Tri.	<p>Supervisors should inform staff or customers if they get too close to these objects whilst their awareness maybe impaired through being too busy, poor lighting, lost or working, not showing due care etc. to prevent accidental injury and/or damage to site property.</p>

<b>Pillars/Corners and pointed sharp edges from site/plant equipment, fencing</b>	Physical Injury	Employees, Customers	Supervisors should be aware of the shelving areas around the walls and pillars, sharp edges from fencing or plant equipment throughout the venue - site and any pointed edges they may have. Care should be taken at all times, and good observation and concentration to avoid any incidents or accidents.	1	2	2	Acc.	See 'Wall Fittings'. In addition to this Supervisors should attempt to ensure that these areas have any unwanted equipment or plant removed on a regular basis, to reduce any risks.
<b>Stairs/ Falls from Height</b>	Physical Injury	Employees, Customers	Supervisors should ensure that customers or themselves are not positioned at the top of stairs or place themselves in vulnerable positions which may allow them to be knocked over or fall a considerable distance. Supervisors must not work above ground level at height, or stand on or use ladders or platforms, if not trained to do so and authorized. If on patrol and site staff are working at height, patrol in safe areas/zones only.	2	3	6	Sub.	A qualified First Aider should be on site at all times, and a Health & Safety Officer or person responsible for H&S issues.  Supervisors must be aware when working in a stage pit area, and be mindful and observant when working these areas, and manual handling and person handling.  Supervisors should read the AIs and RAMs and any other SOPs related to the venue – site, if in doubt ASK!

Hazard	Harm	At RISK	Risk Control in place	Factors			Risk Rating	Additional Risk control to be considered or implemented
				L	S	R		
Furniture or Obstacle's	Physical Injury	Employees, Customers	Supervisors should be aware of their situational surroundings, as any injury caused by these could cause a major incident in the event of a full venue - site evacuation. This also minimises the potential for Supervisors or People tripping over and becoming injured or crushed. Supervisors are to be mindful and observant when ejecting people and furniture or obstacle's in the path way, route.	1	3	3	Mod.	Supervisors should be actively monitoring obstacles or plant equipment, when patrolling or moving around the site. They should also ensure that when a table/ seating area is vacated, say in the staff welfare units or cabins that all the chairs are placed back in the correct position, and housekeeping is adhered to at all times, and the removal of rubbish on a regular basis.
Client's Property Used on Site	Physical Injury	Employees	Supervisors should ensure that all equipment provided by the client, i.e. the Two-Way Radio, Mobile phones, welfare facilities, are in full operational and working order at the start of every shift, SOS. Under no circumstances should Supervisors use any IT or computers unless authorized to do so by the company and the client.	1	3	3	Mod.	Any faults with equipment should be immediately reported to both the venue and management so corrective action can immediately be put in place.

**Tel: 07787788811 dgap@hotmail.co.uk**

<b>Emergency Evacuation</b>	Physical Injury/ Psychological Effects	Employees, Client, Client Staff, Customers	<p>There are a number of emergency exits on and around the site. Supervisors should be aware of where these exits are and ensure that they are all kept clear and maintained at all times.</p> <p>Supervisors must ensure that they are familiar with the premise's layout and be aware of potential fall areas in the event of an evacuation.</p>	1	3	3	Mod.	<p>All Supervisors should be aware of and understand the fire evacuation plan, be fully aware of the venue layout and know what role that they, and other team members, play in the event of an evacuation.</p>
<b>Noise Levels</b>	Physical Injury	Employees	Supervisors should be made aware that at times that plant equipment and drilling may reach a level that could cause long term damage to their hearing if persistently exposed to it for a prolonged duration. PPE must be worn at all times, especially if working in the pit area and another area where they are exposed to loud noise.	1	2	2	Acc.	<p>Supervisor should be provided the option of having their own ear protectors. In addition to this the Site Manager or Supervisor should rotate their positions so that during the shift they all have a period where they are stationed away from excessive noise. However, where there is no manager in place Supervisors should use an adult approach and regularly rotate, and the Site Manager oversea such actions.</p>

**Room 704 Cameron House, White Cross Industrial Estate, South Road, Lancaster, Lancashire, LA1 4XF.**  
**Tel: 07787788811 dgap@hotmail.co.uk**

<b>Lone Worker Isolation and Any Communication issues</b>	<b>Physical Injury</b>	<b>Employees</b>	<p>The Supervisor must ensure that they have the community radio with them at all times during the shift especially if he/she is the only Supervisor on duty for the shift. All Supervisors must use internal radios for communication due to blind spots throughout the site or breaks in the line of sight between team members. Regular radio checks and SOS checks should be made in addition, also the use of mobile phones should be used if no radios are in operation.</p>	2	3	6	Sub.	<p>All Supervisors to be fully trained in radio operation procedure (both internal and community) and ensure that the correct checks are performed on the radios before the shift starts. They should also be made aware of where blind spots are and circumstances where they could become isolated for a period of time.</p>
<b>Site Patrol/ Toilet and Vulnerable area Checks</b>	<b>Physical Injury</b>	<b>Employees, Customers</b>	<p>The Supervisors should remain vigilant at all times whilst conducting tours of the site internally &amp; externally, and checking the toilets and all other sensitive areas. The Supervisor should aim to avoid unnecessary confrontations with customers, if assistance is required it should be called for immediately (see notes on lone worker communication).</p>	2	3	6	Sub.	<p>Supervisors to ensure they are familiar with the premise's layout and the available points of ejection, escape or evacuation. They should also be aware that lighting levels will be low in areas of the site, if tower lighting, static or mobile are not in place. Also see Lone Worker Isolation notes.</p>

Verbal Abuse	Psychological effects	Employees	Supervisors should maintain a friendly demeanor at all times whilst performing their duties. Try to discourage verbal abuse from potential/ actual customers. However, it must be accepted that this may often occur when the Supervisor is performing their duties.	3	1	3	Mod.	Supervisors should not respond in a manner to antagonise situations further causing them to escalate. Conflict management training is mandatory for all Security Supervisors, and they should act as per their training, using good communication skills, and conflict management. All incidents of verbal abuse no matter how minor MUST be reported in written form in your report logs, and to a line manager, if serious to the police.

Hazard	Harm	At RISK	Risk Control in place	Factors			Risk Rating	Additional Risk control to be considered or implemented
				L	S	R		
<b>Violence towards Supervisors, Client Staff and Customers</b>	Physical Injury/ Psychological effects	Employees, Client's Staff and Customers	Supervisors should take a proactive role in stopping situations escalating into physical confrontation/ violence. If the Supervisor witness's physical altercation/ assault the customers or staff workers, if safe to do so the aggressor involved should be detained (if applicable or safe to do so). Then the police called if the situation warrants it.	2	3	6	Sub.	Supervisors should always request assistance when ejecting a person from the site and be aware that the person to be ejected may require restraining. See Lone Worker Isolation and Site Patrol/ Toilet Check notes. All ejections must be documented on the relevant forms and given to the site manager to counter sign. Conflict and Physical intervention training will be provided by the company when applicable. In addition to the above a qualified First Aider should be on site at all times. Or you may have to call the emergency services. All incidents MUST be reported in your report logs and to a line manager asap.

**Room 704 Cameron House, White Cross Industrial Estate, South Road, Lancaster, Lancashire, LA1 4XF.**  
**Tel: 07787788811 dgap@hotmail.co.uk**

Hypodermic Needles	Physical Injury/ Psychological effects	Employees	Supervisors should be actively aware of any signs of drug use around the site externally in some deprived areas. They should never directly handle hypodermic needles without adequate protection. If searching is permitted on site, under no circumstances should the Supervisor ever place their hand into an area they cannot see into. For example, the bottom of a customer's bag, compartments of a wallet/purse, down the side of a cushion/ seat. Also if vehicles are being searched the same principals apply.	1	3	3	Mod.	If the Supervisor does accidentally prick themselves, they should seek medical attention immediately and minimise their contact with other people.
Suicides	Psychological Effects	Employees	Supervisors should be touring the entire premises on a regular basis and customers for strange behavioral patterns.	1	3	3	Mod.	A qualified First Aider should be on site at all times to administer immediate medical attention. In this situation the emergency services should always be called.

<b>Searches</b>	Physical Injury	Employees	<p>Supervisors should be aware of the potential sharps and contamination hazard that can result due to a search not being performed correctly (see notes on 'Hypodermic Needles').</p> <p>Only if searching is allowed, then safety should be observed at all times, when performing such actions.</p>	1	3	3	Mod.	<p>When it is necessary to search customers, visitors, contracts or staff workers, Supervisors should always ensure that the customer (self-search) fully empties their pockets/wallet/bag/purse, this also applies to vehicle searching etc. themselves.</p> <p>Under no circumstances should the Supervisor take unnecessary risks by placing their own hand into anything that they cannot see clearly into and/or not wearing laytex or needle stick proof gloves during the search procedure. (See notes on 'Hypodermic Needles')</p>
<b>Moving Traffic Crossing Highways</b>	Physical Injury	Employees, Customers	<p>Supervisors should ensure that on potentially busy times, (e.g. start and end of shift times, breaks and delivery slots, or special events. They are aware of the road and attempt to direct customers away from it. This is to stop people traveling onto the road and potentially injuring themselves.</p> <p>No vehicle movement should take place when pedestrians are at risk of coming in to contact with them, all site movement should be supervised by a banksman.</p>	1	3	3	Mod.	<p>Supervisors should discourage delivery drivers from pulling up quickly directly outside any pedestrian areas. Also at the end of the shift when the customers or staff are leaving the site they should be marshaled to minimise the amount of people walking into the road unsafely.</p>
